### MANUFACTURERS' REPRESENTATIVES STOCKING DISTRIBUTORS

Since 1975, Thompson - Hopps has provided pumping equipment, fiberglass sumps, and pressure tanks for commercial, institutional, industrial, and municipal applications. Different types of centrifugal pumps include submersible, vertical shaft type, self-priming, end suction close coupled and base mounted flexibly coupled. Pumped liquids generally are water from drainage systems, raw sewage or sewage effluent, hot or cold condensate, and potable water. We offer design assistance to consulting engineers and contractors. Submersible pumps from 1/3 HP to 15 HP are generally in stock. We **repair** and **rebuild** submersible, vertical shaft, & end suction pumps.
